## Loma nominated for another Top Award

For the second consecutive year, Loma Systems, global leaders in the design and manufacture of inspection equipment has been nominated for a Food Processing Award 2011.

Loma was picked as a finalist in the Robotics and Automation category and was nominated due to the innovation of its IQ<sup>3</sup> Metal Detector at Persis in Wembley. Persis is a family run business which focuses on bringing the best quality desserts to customers. Loma helped maintain these high food safety standards in production by installing and commissioning a state of the art IQ<sup>3</sup> Metal Detector conveyor.

Now in their 28th year, the awards are the most sought after in the Food Processing sector and the nominations are judged globally by the public. Last year over 3,500 people voted for Loma Systems to win the technical development accolade and Loma was a runner up in the Innovation category.

Simon Spencer, Managing Director of Loma Systems comments, "Being nominated once is a great achievement, but been nominated in consecutive years is a remarkable accomplishment".

Loma is a global leader in metal detection, X-ray inspection and checkweighing and is renowned for accurate, reliable and tough inspection solutions to the food industry. With over 40 years of experience Loma continues to provide market leading technology and this accolade reinforces Loma's leading position.
